### How can we make this promise?

Quite simple - our Leader Programme employs 'Solution-Focused' learning techniques with a proven track record of success around the world.

## What is Solution-Focused Thinking?

For 30 years, Solution Focused Brief Therapy (SFBT) has been developed as a positive and pragmatic way to work with individuals and organisations. As the name suggests, it's about focusing on solutions, rather than problems. We say, rather than focussing on what is wrong, it is much more effective to talk about solutions. Thus bringing a degree of realistic, effective relief as quickly as possible.

The approach values simplicity in philosophy and language, aiming to discover "what works" in a given situation, simply and practically.

**It has been so successful that it is widely used in teaching, management, healthcare, social work and government.**

“Solution Focused had a massive impact on our organisation and enabled us to achieve both our business targets and personal goals. We would highly recommend engaging with Solution Focused.”
